

B. C. COTTON: ADDITIONS TO THE INDEX  
OF HIS NEW SCIENTIFIC NAMES

HELENE M. LAWS

*South Australian Museum, Adelaide*

Since publication of the Bibliography and Index to New Names of B. C. Cotton (Laws and Mincham, 1968) a number of friends and co-workers have drawn my attention to several omissions in the list of new names. The first editions of Cotton's handbooks covering the bivalves and chitons were inadvertently omitted from the publications as they were checked for new names. Publications involved are listed below, numbered as in the original bibliography, and the additional list of new names follows.
